Technical Parameter

| Detector type Array size/format Field of view/min focus distance Spatial resolution (IFOV) Thermal sensitivity Frame frequency Focus | Un-cooled FPA micro-bolometer 160×120 25°×19°/0.5m 2.72mrad 40.06°C@30°C | 384×288 |
|--|--|--|
| Field of view/min focus distance Spatial resolution (IFOV) Thermal sensitivity Frame frequency | 25°×19°/0.5m 2.72mrad ≤0.06°C@30°C | |
| focus distance Spatial resolution (IFOV) Thermal sensitivity Frame frequency | 2.72mrad ≤0.06°C@30°C | 1 32mrad |
| Thermal sensitivity Frame frequency | ≤0.06°C@30°C | 1 32mrad |
| Frame frequency | | |
| Frame frequency | EOU- | ≤0.04°C@30°C |
| to the second se | 50Hz | |
| | Manual | |
| Zoom | 2X , 4X 8-14µm | |
| Spectral range | | |
| Built-in CCD camera | 3 million pixels, COMS camera modules, 2 LED lights | |
| | 3.6" TFT LCD, 640 x 480 | |
| | IR and Visual image can be shifted fast; image fusion. | |
| | | |
| | | |
| | ± 2°C or ± 2% of reading, Whichever is greater | |
| | | |
| Measurement mode | Up to 5 movable spots. Up to 5 movable areas. Up to 2 movable lines (maximum, minimum and average temperatures). Line profile. Isotherms. Temperature difference. Alarm(voice, color) | |
| Measurement Image control | Color palette 11palettes changeable | |
| | Image adjustment Auto/manual gain and brightness | |
| Setup functions | Date/time, temperature unit, language Variable from 0.01 to 1.0 | |
| Emissivity correction | | |
| Background temperature correction | Automatic corrections according to u | ser input |
| Atmospheric transmission correction | Automatic correction according to user input object distance, humidity and temperature | |
| Storage card | 8G SD card, max 32G Manual/Auto single file saving, IR and Visual image link saving, fusion recording | |
| Storage mode | | |
| Image storage File format Voice annotation | Thermal: JPEG with original thermal measurement data included; | |
| | H.264 in network recording Visual: JPEG; H.264 with fusion. | |
| | Input via built-in microphone up to 60 seconds of digital voice clip | |
| | per image stored with image | |
| Laser locator | Class 2, 1mw/635nm(red), IEC 60 285 | |
| | Li-Ion, rechargeable | |
| | 3 hours continuous operation Intelligent charger or car power adaptor 12V(optional) Auto-sleep and auto-shut down 12V DC | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | - | |
| | | |
| | | |
| | | |
| | | |
| | rnal network input With function of IP address real-time image transferring setup | |
| | | |
| | | |
| | Image control Setup functions Emissivity correction Background temperature correction Atmospheric transmission correction Storage card Storage mode File format Voice annotation Laser locator Battery type Battery type Battery operating time Battery charging mode Power saving External power Operating temperature Humidity Encapsulation Drop test Weight Dimension (W×H×D) SD card slot External network input Video output Audio / data transfer | Image display IR and Visual image can be shifted fa Image processing Automatic / manual/ auto-enhancen Temperature ranges -20°C- +35°C (can expanded to 1200 Accuracy ± 2°C or ± 2°% of reading, Whichever is Measurement correction Automatic / manual / up to 5 movable spots. Application Gallery

Application in power industry

Application in construction

- · Clamps & transmission equipment detection
- Power transformation & distribution

Application in technology

- Insulation trouble Hollowing detection
- Window airtightness Radiators and pipes

Application in electrical and mechanical industry

- Temperature distribution measurement Security detection
 - - HVAC error
 - Insulation failure Components malfunction
 - Loose interface detection Repair verification

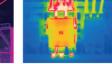

New energy application

• Temperature differences judgement

Temperature change analysis

- Measurement of LED chips and lights temperature and cooling process
- Detection of Solar components hot spots, solar cells welding process, inverter and circuit
- Analysis of high and low temperature distribution, temperature uniformity and differences in manufacturing

Drop-resistan.

Dual LED fill lights make clearer shot

300 million pixel CMOS camera modules inside

 $0.160 \times 120/384 \times 288$ pixel

Laser locator

7.4V/1800mAh rechargeable lithium batteries inside, this is battery cap open button

Newly released by DALI, T4/T8 series, using a new ergonomic design concept, are a kind of handheld IR Thermal Imaging Camera designed for Electric & Industrial predictive maintenance with pixel of 160×120 /384×288. T4/T8 will give a fusion display with the 3 million pixel daylight image and IR thermal image through a convenient 3.6" touch screen at your fingertips. Importantly, Network real-time transmission of pictures and video features play an excellent role in the field of scientific research and industrial control.

3 million daylight image

3.6" touch screen

Dual LED fill lights make clearer shot

Fusion display of IR & daylight image

Bluetooth audio transmission

Developed with user friendly and easy operating "GUI" system

Standby interface Main menu

Bluetooth setting

Internet setting

pictures and infrared videos

Real-time video tranfering to professional IR Video Analyse Software on your computer
