## VDG NVH-KEY1002

An easy-to-use, plug-and-play control keyboard. Suitable for right and left handed use.

### Description

The NVH-KEY1002 keyboard comes with jog shuttle, joystick 38 backlit keys, alarm buzzer, and allows the management of CCTV applications from a PC, via USB connection. It can control VDG Sense, emulating a 4-axis 38 keys HID joystick. It can also be used together with other peripheral devices such as keyboards, mouse, joysticks or other accessories.

USB powered for an easy plug-and-play use with only one cable. The keyboard can be turned round so that both right- and left-handed users can use all the functions with ease. This simple, user-friendly and fully implementable keyboard allows a comfortable and intuitive management of VDG Sense.

### Features

- Customizable CCTV oriented keyboard
- Control of PC security software
- USB powered
- 38 Backlit Keys
- Alarm buzzer
- Simple use and installation
- Perfect integration with VDG Sense
- For right and left-handed operators
